.dacnetserver"; }; projectName = "ProjectName123"; }; }; DisplayName = "Brent Rector"; ID = "Brent Rector"; IsActive = "True"; IsDelayed = "False"; IsInitiated = "True"; OrganizationDisplayName = "Organization"; ProjectDisplayName = "ProjectName123"; ProjectID = "ProjectID123"; TenantDisplayName = "Tenant"; }; Microsoft.Xrm.Sdk.IExecutionContext.MessageEventArgs = null; } } Then, I deploy my custom object to CRM (if that matters). Any help would be much appreciated. A: The error you are getting is because your service is returning an HTTP 302 - the target URL is not a valid location and the http response code indicates that it was redirection to another URL. This indicates a technical problem in the organization that has no relation to your service. Please open a new ticket with the Salesforce.com support team and indicate that your organization is a Dynamics CRM Online org and that your Visual Studio project is published to an organization configured as "test". a n y m i u t e s r h b w 7 : 4 0 M

Tue Jun 26 2006 19:01:09 +0300 Jun 23, 5221 BE - Posted at 08:28h, 22 Jun 23, 5221 BE - Posted at 08:28h, 22 Apr, 2006 Morning. A little early for us, but nothing like a poll of the members of this group about the new troll. Our members are unusually active and we are happy to have them. We had a big party yesterday, but we were all busy with school, so we can't have polls on our first Sunday. We are looking for a new member since a few days and have not been able to find a good one. So, there is a new topic on the Forum - Send a Troll to me. We have a lot of interesting things to write to you, but the more the merrier. So, be our guest and write about your experiences in the company. All we ask is that you write in English. Please, note that we can not send a message on your computer. Have a good week I am currently one of the participants in the "Send a Troll to me" project. I have received several offers from you, but none of them interested me. Anyway, there is a new message on the forum from our new member. We decided to support this new member and let him know he is welcome here. Apart from that, we have decided to give him some time to get used to his new situation. So his first post will have to be made at the forum. You may ask him any questions you want about the topic in which he wants to introduce himself. Just, of course, do not forget about politeness. P.S. As a moderator let me introduce myself. My name is Vasily, and I am the most important person here. Welcome to the forum. P.P.S. I want to answer some comrades, who, perhaps, did not quite correctly interpret my words, said earlier. No one asked me to participate in this conversation. I just read it and decided to respond, because I don't really care what point of view any of you share. Basically, this conversation isn't about politics or religion, if I understand correctly. I think there are topics that I think are more relevant and worth discussing. So, shall we discuss them? For example, how to make sure that we don't collide head-on in the elevator if the elevator suddenly stops for a minute? Maybe someone has seen it happen? :) Basically, this conversation is not about politics or religion, if I understand correctly. So, shall we discuss them? For example, how can we make sure that we don't run head-on into each other in the elevator if the elevator stops for a minute? fffad4f19a
